GENERAL

Part numbers applicable to parts are subject to change from time to time. Therefore, new parts list can be published easier and will be more convenient to you if they are separate from the Maintenance Instructions with Illustrated Parts Lists manual. See the current price list for prices.

The parts list contains a separate list of parts for each Ram. Each list has the same figure number as the exploded illustrations contained in this Parts Book and the Maintenance Instructions with Illustrated Parts List manual supplied with your Jack.

These lists are made up of three columns as follows:

1. Index Number — This index number corresponds to the number adjacent to each part on the illustrations found in the Parts Book and the Maintenance Instructions with Illustrated Parts List manual supplied with your Jack.
2. Part Number
3. Part Name

When ordering parts, please give the following information:

1. Model number of your Jack.
2. Desired part number and name.
3. Quantity desired.

HOW TO USE THE PARTS LIST

1. Obtain the figure number and index number from the exploded illustration of the Jack model you want.
2. Locate the corresponding figure number and index number which is on the opposite page of each exploded illustration to obtain the part number for the desired part.
