Placard Parts List

TAJS-3000 Trouble Shooting

This section contains a list of problems which may be encountered and their solutions. If the solution listed fails to correct the problem, contact customer service at the address and numbers on the back cover of this manual. Please have the model number, and serial number of your jack available. The serial number is on a silver weld tag on top of the head plate.

PROBLEM CAUSE / SOLUTION

Fails to lift loadInadequate air pressure, 200-PSI required.
Air leaks, locate and correct leaks.
Overloaded, use larger capacity jack.

Fails to hold loadStand pin not engaged.
Packing molded, cup and wiper rings need replaced.

Lift will not come down.....Piston has been side loaded. Straighten
Debris is between piston weldment & cylinder wall. Remove any debris.

****Please be sure to exhaust all air pressure before removing top cylinder cap for any reason.***
