TROUBLESHOOTING

Problem: Drawers appear not to fit, do not slide in accurately and bump the cart sides.

Solution: The roller bearing slides must be fully engaged into the mounting slots on all drawers. They potentially could fall out of position in shipment or during assembly. Remove the drawer that is out of position. The drawer is removed by the two clips on the roller bearing slides. Simply push the roller bearing slide back down into position. Insert the drawer back onto the roller bearing slides.
