~~71250W~~ 71250W

INDEX NO.	DESCRIPTION	PART NO.	QTY.
1	2 piece handle	218005	1
2	Expansion pin	218006	1
3	Handle retainer screw	218007	1
4	Torsion spring	24001	1
5	Handle base assembly	215010	1
6	Pin	27002	1
7	Handle base flat gear	215023	1
8	Cotter pin	27006	1
9	Overload cap screw	218011	1
*10	Overload O-ring	218012	1
11	Adjustment screw	218013	1
*12	Upper spring container	218038	1
*13	Overload spring	218028	1
*14	Lower spring container	218039	1
*15	Overload check ball	9004	1
16	Oil fill screw	218036	1
*17	Oil fill gasket	218037	1
18	Cupped gear	215022	1
19	Release valve assembly	215015	1
20	Release valve	215016	1
*21	Copper packings	215017	2
22	Release valve collar	215018	1
23	Valve cap	218009	1
*24	Back-up ring	218019	1
*25	O-ring	218021	1
*26	Injection port check ball	218022	1
*27	Separator spring	218041	1
*28	Suction port check ball	218023	1
29	Pump piston	219024	1
**30	Pump oil seal	219008	1
**31	Pump back-up ring	219026	1
**32	Pump O-ring	219027	1
*33	Ram retainer ring	218051	1
34	Ram retainer washer	219029	1
*35	Ram "U" cup seal	218052	1
36	Ram bearing	218053	1
37	By-pass screw	218054	1

INDEX NO.	DESCRIPTION	PART NO.	QTY.
*38	By-pass spring	218033	1
39	Lower spring container	218056	1
*40	By-pass check ball	218016	1
41	Ram	218058	1
42	By-pass valve pin	218057	1
43	By-pass limit pin	218029	1
*44	Oil reservoir O-ring	215062	1
45	Cylinder nut	218031	1
*46	Cylinder nut O-ring	219031	1
*47	Cylinder nut oil seal	218032	1
48	Complete hyd. block assy.	219200	1
49	Caster wheel assembly	219080	2
50	Hyd. oil block & caster mt. screw	31002	2
51	Caster mtg. screw	31003	2
52	Lock washers	22002	4
53	Handle base pivot screw	219067	1
54	Elevator arm pivot pin	219068	1
55	Kick plate pivot pin	219033	1
56	Cotter pins	219034	2
57	Kick plate	219036	1
58	Trunion	215063	1
59	Cotter pin	27004	1
60	Ram retraction spring	24004	1
61	Trunion retaining rings	215076	2
62	Oil zerk fitting	215122	1
63	Elevator arm assembly	219125	1
64	Lifting saddle	218121	1
65	Guide arm pivot screws	219069	2
66	Washers	22001	2
67	Handle base pivot screw	219066	1
68	Retaining ring	215073	1
69	Guide arm nut	21002	2
70	Guide arm lock washer	22004	2
71	Frame assembly	219100	1
72	Retaining ring	215071	2
73	Wheel washer	22003	2
74	Front wheels	218072	2

Not Shown - Flat gear P/N 218066

*Designates those parts included in repair kit #218500.

**Designates those parts included in supplement pump kit #219500. - obsolete

HEAVY DUTY PROFESSIONAL FLOOR SERVICE JACK

Model 71250W

WIDE FRAME PROVIDES MAXIMUM
STABILIZATION OF LOAD

2½

TON CAPACITY

offers an honest 2½ ton lifting
capacity and still maintains
an easy pump operation.

COMPARE THESE FEATURES:

Safety

- **OVERLOAD SYSTEM**—prevents jack from being used beyond rated capacity.
- **BYPASS SYSTEM**—prevents ram from causing damage to cylinder when jack is pumped to full height.

Convenience

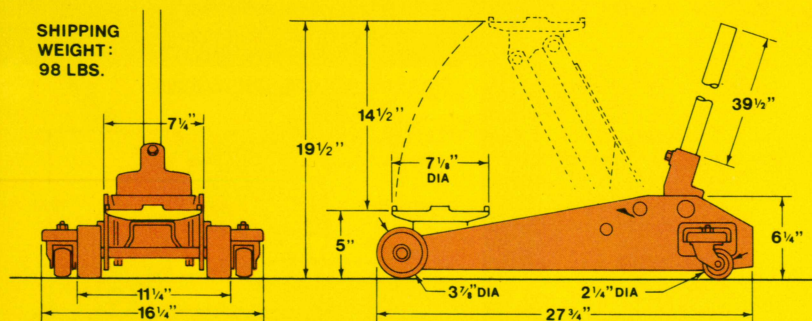

- **FACTORY LUBRICATED**—ready for immediate use.
- **2-PIECE, FULL-LENGTH HANDLE**—easy to engage and remove. Knurled handle grip for safe, easy turning to raise or lower.
- **STEEL HANDLE BASE & PUMP PLUNGER**—provide smooth, positive pumping & release valve operation. They also provide fast rising action and gentle, controlled, lowering of load.
- **RAPID, EFFICIENT PUMP ACTION** — full 90° handle swing for fast saddle raising and also pumps easily in positions where handle stroke is restricted.
- **FULL SWIVEL BALL-BEARING REAR CASTERS**—positioned for best load distribution and easy maneuvering.
- **PACKAGING** — protects jack against rough handling in shipment and is designed to save warehouse space. A complete owners manual is included.

Dependability

- **LARGE, HEAVY DUTY DISHED SADDLE** — is made of a strong steel stamping which swivels and has positioning lugs for easy load centering and cradling oval contours of differentials.
- **LARGE, WIDE-TRACK FRONT WHEELS**—for better stability on uneven surfaces.
- **LONGER LIFE PUMP PLUNGER AND RAM** — are heat treated and flashed chromed. Special dust/oil seals prevent dirt and moisture from entering the hydraulic system.
- **EXTRA STRENGTH FRAME AND LIFT ARM** — are made from high carbon steel in order to support 2½ ton load.

SPECIFICATIONS:

SHIPPING
WEIGHT:
98 LBS.
