Hydraulic Floor Service Jack

Owner's Manual and Spare Parts List

Model 400

2½ TON Capacity

Important

Please read these instructions carefully before using your jack.

Proper use and care of the jack will help to assure you of continuous, safe, trouble free performance

QUALITY GUARANTY LIMITED WARRANTY

INTERMARKET INC WARRANTS, to the final purchaser, jacks and related service equipment distributed by it to be free from defects in material and workmanship for a period of 90 days from date of sale.

If a jack or related equipment is determined to be defective during the warranty period, it will be repaired or replaced without charge provided that the equipment is shipped, transportation charges prepaid, with proof of date of purchase, to INTERMARKET INC. or to a designated field service depot.

This warranty does not apply to parts damaged from accident, overload, or abuse, nor does it apply to any product which has benn altered or used with especial attachments other than recommended by the distributor or their equivalent. THERE ARE NO OTHER WARRANTIES OF ANY SORT; EXPRESS OR IMPLIED, AND SELLER ESPECIFICALLY DISCLAIMS ANY WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE. THE SELLER'S SOLE OBLIGATION, WHICH SHALL REPRESENT THE BUYER'S SOLE AND EXCLUSIVE REMEDY, SHALL BE TO REPAIR OR AT THE SELLER'S OPTION TO REPLACE ANY PRODUCT OR PART DETERMINED TO BE DEFECTIVE AS AFORESAID. IN NO EVENT SHALL THE SELLER BE LIABLE FOR ANY SPECIAL, DIRECT, INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES OF A SIMILAR NATURE, INCLUDING, WITHOUT LIMITATION, LOSS OF PROFITS OR OF PRODUCTION TIME, OR LOSS OR EXPENSES OF ANY NATURE, INCURRED BY THE BUYER OR ANY THIRD PARTY.

Hydraulic Floor Service Jack

Owner's Manual and Spare Parts List

Handle Assembly Instructions

- 1. Remove bolt (Ref. Nr. 62) and insert top section into bottom section.
- 2. Align bolt holes and insert bolt through handle, install nut (Ref. Nr. 61) and tighten.
- 3. Loosen pump beam bolts (Ref. Nr. 28) and insert handle into pump beam.

 Be sure release valve shaft is properly aligned with square hole in bottom of handle.
- 4. Tighten pump beam bolts to secure handle in place. DO NOT OVERTIGHTEN. Handle must rotate freely for proper release valve operation.

Safety Rules

- 1. Use jack on solid flat surface only. Jack wheels must be permitted to roll during operation.
- 2. Set parking brake and block wheels of vehicle before raising.
- 3. Use factory recommended vehicle lifting points only.
- 4. Center lifting point on jack saddle to prevent slipping.
- 5. Do not drive off raised jack, damage to both vehicle and jack could occur
- 6. JACKS ARE DESIGNED STRICTLY FOR LIFTING. WHEN WORKING UNDER A RAISED VEHICLE ALWAYS USE GARAGE STANDS TO SUPPORT VEHICLE.

Operating Instructions

To Raise

- 1. Position jack correctly under vehicle to be raised.
- 2. Close release valve by turning handle clockwise (right) until sung. DO NOT OVERTIGHTEN.
- 3. Pump handle until saddle reaches jacking point.
- 4. Check to be sure jacking point is centered on saddle between slip lugs.
- 5. Pump handle until desired height is reached.

To Lower

- 1. Slowly turn handle counter-clockwise (left) to open release valve.
- 2. Lowering speed is controlled by the amount the release valve is opened.

Maintenance

- 1. Store jack in fully lowered position in a dry, clean location.
- 2. Lubricate frequently all axles, external screws and bearing surfaces.
- 3. Inspect lift and pump piston frequently for rust or corrosion. Clean as needed and wipe with oily cloth.

Service

 Poor lifting performance may be caused by air in the hydraulic system from shipment and handling. To correct this situation all air must be purged using the following procedure: open release valve fully by turning handle (or release control knob) counter-clockwise (left).
 Using full stroke pump handle several times to remove all air.
